

Curriculum Vitae

Paweł Faron

Address: ul. Piltza 21 Kraków

Phone: +48 514 527 973

E-mail: pawelfaron@protonmail.com

Date of birth: 12.12.1987

EXPERIENCE

▪ **TantusData** *December 2021 – Still*

- **Lead Data Scientist / Machine Learning Engineer**
- Architecting and building NLP solutions using OpenAI stack and OpenSourced models:
 - Creating GTC 2024 demos based on LLM and agents
 - Participating in Nvidia Technical Championship program and helping with NIMs
 - Preparing RAG based solutions:
 - ChatBots and virtual assistants
 - Systems for data matching and finding discrepancies
 - Preparing solutions for user feedback monitoring based on LLMs
 - Preparing system for code generation for document analysis
 - Preparing POC and demos with suggested solutions for clients
 - Implementing working prototypes
 - Utilizing Python, langchain, HuggingFace, Wisper, Pinecone and others
 - Fine tuning LLM models
- Preparing LLM based application / services based on:
 - Open source models – Llama-2, Mistral-7b, Mixtral
 - LangChain – contributing in the LangChain project
 - LlamaIndex
 - Nvidia stack
 - Creating Streamlit based front-ends.
 - Creating solutions deployed on Azure, AWS
 - Utilizing AirFlow, Graphana, Phemetheus
- *Creating system for shop monitoring*
- *Deploying models on AWS SageMaker and creating experimentations environment*

▪ **ALM Services** *January 2019 – October 2021*

- **Lead Data Scientist / Machine Learning Engineer**
- Creating custom machine learning solutions for NLP:
 - multilingual content moderation
 - topic extractions
 - recommender systems
 - chat-bots
- Creating Computer Vision solutions:
 - Embedded solution for counting moving objects, reading license plates, detecting movement
 - Embedded solution for actions recognition

Curriculum Vitae

- Algorithms for exercise corrections
- Damage and part detection solutions
- Algorithms for anonymizing videos and images
- Creating solutions for video streaming and object detections.
- ADAS solutions:
 - Detecting and tracking road lanes
 - Detecting and tracking road signs, cars, traffic lights
- Time series data classification:
 - Creating models for classification of time series data using LSTM or custom features extracted from data
- Utilising ready cloud solutions:
 - AWS for model serving, image moderation, topic extraction, model training
 - Google for chat-bot creation
- Deploying models to cloud and embedded devices:
 - Preparing Docker configurations and prediction code for SageMaker and Lambda
 - Running performance tests
 - Performing manual deployment
 - Preparing scripts for automated deployment
 - Integrating deployment with CI\CD
 - Creating Lambda\Gateway for RESTful API for models
 - Configuring Kubernetes environment
- Creating big data (Spark) pipelines for data analysis
- Main technologies used:
 - Python, Java, C++
 - Tensorflow, Keras, pytorch, Spark, Kafka, Docker, Kubernetes
 - AWS SageMaker, AWS Lambda, AWS DynamoDB, AWS EC2, AWS S3, serverless

EPAM

January 2017 – January 2019

Lead Software Developer

- Creating custom machine learning solutions for NLP and computer vision problems.
- Building model for information extraction, text classification and image labelling.
- Creating Robotic Process Automation applications in Groovy/Java.
- Creating custom solutions in Spark for data analysis
- Utilizing TensorFlow, Keras, DeepLearning4j, Python, Spark
- Automating business processes in Workfusion and BluePrism

Corvil

July 2015 – September 2016

Big Data Engineer (Real-Time Stream Processing)

- Creating software to process, analyze and store big network traffic in real time
- Creating backend and frontend software (C++, Java, Python, Hadoop)
- Customizing, patching and integrating open source software for Linux platform
- Creating auxiliary software and scripts for Linux platform
- Creating unit and component tests

Samsung Electronics

August 2013 – June 2015

Senior Software Developer

Curriculum Vitae

- Developing embedded software for LTE base stations in C/C++
- Working on Self Organizing Network algorithms
- Creating and maintaining Jenkins' jobs
- Creating auxiliary software and scripts for Linux platform
- Creating unit and component tests
- Preparing technical documentation

Motorola (contracting) / Nokia Siemens Networks

October 2010 – July 2013

Software Developer

- Developing and maintaining embedded software for LTE base stations in C++.
- Working on RRC layer and Self Organizing Network algorithms.
- Writing auxiliary tools and scripts in Python\Perl\Bash
- Writing Unit Tests in Google Test \ Google Mock
- Writing Component Tests in TTCN-3
- Working in SCRUM teams

Novitus S.A - Nowy Sącz

March 2010 – September 2010

Software Developer - intern

- Developing embedded software for payment terminals in C.
- Creating data extraction application in C#
- Testing and maintaining existing software.

Certificates

Deep Learning Specialization

- Course from <https://www.deeplearning.ai> divided into following sections
- Course 1 Neural Networks and Deep Learning
- Course 2 Improving Deep Neural Networks
- Course 3 Structured Machine Learning Projects
- Course 4 Convolutional Neural Networks
- Course 5 Sequence Models

Machine Learning

- Course from Stanford online
- 11 weeks course covering machine learning with exercises in Octave

Machine Learning Engineer

- Course from Automation Academy by WorkFusion
- Covered automation of information extraction and text classification

Machine Learning Data Analyst

- Course from Automation Academy by WorkFusion
- Covered data preparation, statistics calculation and accuracy measurement

Curriculum Vitae

Other Projects

QtCreator development contribution

- Adding ideas for new features and improvements for existing ones.
- Developing features and improvements.
- Support in bugs troubleshooting and corrections.

Created iOS application for <http://121go.pl>

- Created code in iOS for iPhone phones
- Utilization of GPS location
- *Client/Server communication model*
- *121go - an innovative e-service to track employees on the go through mobile phones*

Education and training

State Higher Vocational School in Nowy Sacz

2006 - 2010

Computer Science

Activities and Societies: Programing circle.

Engineering Studies

Jagiellonian University in Cracow

2010 - 2012

Computer Science

Master Studies

Created system for acquiring, processing and analyzing of psycho-motor tests

- tests are performed using an Wacom tablet
- application created in C++
- gui created with Qt framework
- target platforms: Windows, Linux

Certificates

LTE/EPS Fundamentals

SKILLS

Programming languages / (computer) technology:

- **Programming languages:** C/C++/C++11, Java, Perl, Python
- **Tools and Libraries:** STL, C++ Boost Library, Qt, Microsoft Visual Studio, Windows API
- **Operating systems:** Windows, Linux, iOS
- **Network Programming**
- **Databases:** SQLite, MySQL
- **Subversion:** SVN, Git, ClearCase

Language skills

Curriculum Vitae

- **English:** advanced
- **Spanish:** basics
- **Polish:** Native

I hereby give consent for my personal data included in my application to be processed for the purposes of the recruitment process under the Personal Data Protection Act as of 29 August 1997, consolidated text: Journal of Laws 2002, item 1182 as amended.
